technology or innovation

National Open Access Repository Challenges

National Open Access Repository Challenges

To make sure that works are published
and delivered in open formats

National Open Access Repository Challenges

To implement the institutional
repositories ASAP

National Open Access Repository Challenges

Most people in the government don't
know enough about copyright

National Open Access Repository Challenges

Some aspects of the law are not perfect

National Open Access Repository Challenges

Some aspects of the law are not perfect
Translation, public performance, change
of format

National Open Access Repository Challenges

Some aspects of the law are not perfect

~~Translation, public performance, change
of format~~

National Open Access Repository Challenges

Some aspects of the law are not perfect
“Fix” through additional regulation

National Open Access Repository Challenges

Some aspects of the law are not perfect

“Fix” through copyright law
interpretation

National Open Access Repository Challenges

Some aspects of the law are not perfect
“Fix” through clauses suggestion within
the regulation

National Open Access Repository Challenges

Upload of existing works

National Open Access Repository Challenges

Make sure that every Institutional
Repository is properly licensed

National Open Access Repository Challenges

Expand our reach to the people in charge
of the Institutional Repositories
nationwide
